User Manual

Plot & layout management software for real-estate developers

Welcome to Estatly

Estatly is a desktop application built for real-estate developers, layout promoters and plot-selling businesses. It brings every part of running a venture — plots, buyers, payments, registrations, site work and expenses — into one secure place on your own computer.

No spreadsheets scattered across folders. No registers that only one person can read. Estatly gives you a live, colour-coded picture of every layout you manage: which plots are available, which are under advance or sale agreement, which are registered, how much each buyer has paid and how much is still due.

Everything is stored locally on your machine and protected by a PIN — your data never leaves your device. A unique decoy-account feature adds an extra layer of privacy that no ordinary spreadsheet can offer.

Why developers choose Estatly

- **Visual plot dashboard** — a colour-coded grid and a pinned site map of every plot in the venture
- **Complete money trail** — record every payment by type (White Bank / White Cash / Black Cash / Advance) with automatic balance calculation per plot
- **Buyer & customer registry** — every customer linked to their plots, phone, email and address
- **Registered-plot ledger with separate Auditor and Company views and one-click PDF / Excel downloads**
- **Calendar that fills itself** — registrations, bookings and payments appear automatically; add your own tasks and reminders
- **Work management** — track materials, labour and vendor balances with bills attached
- **General payments ledger for every other project expense**
- **Project file cabinet** — approvals, agreements, photos and receipts in one place
- **Professional reports** — export any project or table to PDF or Excel in one click
- **Private by design** — PIN lock, decoy account, and 100% offline data storage

1. First-time setup — create your PINs

The first time you open Estatly it asks you to create two PINs. This takes less than a minute and is only ever asked once.

The screenshot shows the Estatly app's first-time setup screen. At the top is the Estatly logo and the text "Set up your security PINs". The setup process is divided into three numbered steps, each enclosed in a dashed orange box:

- 1. Main PIN:** This section includes a lock icon, the text "Main PIN", a text input field labeled "Your real PIN", the text "Confirm main PIN", and a text input field labeled "Confirm your real PIN".
- 2. Duress PIN:** This section includes a shield icon with an exclamation mark, the text "Duress PIN opens a decoy account with fake data", the text "Duress PIN", a text input field labeled "PIN for decoy mode", the text "Confirm duress PIN", and a text input field labeled "Confirm duress PIN".
- 3. Set up PINs:** This section contains a large green button labeled "Set up PINs".

Below the setup steps, a message states: "Your data is stored locally and never leaves this device."

- 1. Main PIN** — your everyday password. Enter it and confirm it. This PIN opens your real account with all your data.
- 2. Duress PIN** — a second, different PIN that opens a decoy account filled with harmless dummy data. If you are ever forced to open the app, enter this PIN instead — the real records stay hidden.
- 3. Set up PINs** — saves both PINs and takes you straight into the app.

Your data is stored only on this computer. Nothing is uploaded to any server.

2. Unlocking the app

Every time Estatly starts (or after you press Lock), this screen protects your data.

1. **PIN** — type your Main PIN.
2. **Unlock** — opens your projects. Entering the Duress PIN here silently opens the decoy account instead; there is no visible difference on screen.

3. Your projects — the home screen

After unlocking you land on the projects home. Each venture or layout you manage is one project card.

1. **New project** — create a new venture (see next section).
2. **Search** — find a project instantly by name.
3. **Project card** — shows the LP number, location, creation date, total plots and how many are still available. Click the card to open the project.
4. **PDF / Excel** — export a full report of that project without even opening it.
5. **Edit / Delete** — rename a project or remove it completely.
6. **Settings** — change your Main or Duress PIN at any time.
7. **Lock** — one click locks the app immediately.

4. Creating a project

Click New project and fill in four quick fields — Estatly does the rest.

The screenshot shows a 'Create project' dialog box with a close button (X) in the top right corner. The dialog is divided into five numbered steps, each with a dashed orange border:

- 1 Project name**: A text input field.
- 2 LP number**: A text input field.
- 3 Initial plots**: A text input field containing the number '20'. Below the field, a note reads: 'We'll auto-generate plot numbers (001, 002, ...). You can add more later.'
- 4 Description (optional)**: A text input field.
- 5**: A green button labeled 'Create project'.

- 1. Project name** — as it should appear on reports (e.g. "Green Valley Layout").
- 2. LP number** — the layout permission / approval reference.
- 3. Initial plots** — enter a count and Estatly auto-creates plot numbers 001, 002, 003 ... You can always add more later.
- 4. Description (optional)** — location or any note for yourself.
- 5. Create project** — the venture is ready with its full plot grid in seconds.

5. Settings — manage your PINs

Open Settings from the top bar to change either PIN whenever you like.

The screenshot shows a 'Settings' modal with a close button (X) in the top right corner. It features two tabs: 'Change Password' (highlighted with a green background and a red circle with the number 1) and 'Decoy Account'. Below the tabs, there are two sections. The first section, 'Change Main Password' (highlighted with a red circle with the number 2), contains a 'Current main PIN' field with a toggle icon, followed by 'New PIN' and 'Confirm PIN' fields, and a green 'Update main PIN' button. The second section, 'Change Duress Password' (highlighted with a red circle with the number 3), contains a 'Current duress PIN' field with a toggle icon, followed by 'New PIN' and 'Confirm PIN' fields, and a green 'Update duress PIN' button. Red dashed boxes and numbered circles highlight the tab and the input fields for each section.

1. **Two tabs** — Change Password for your real account, Decoy Account to manage the decoy data.
2. **Change Main Password** — enter the current PIN, then the new PIN twice.
3. **Change Duress Password** — update the decoy PIN the same way.

6. The project dashboard

Opening a project shows the dashboard — a live overview of the whole venture at a glance.

- 1. Sidebar** — every module of the project: Dashboard, Info Page, Registered Plot Details, Customers, Payments, Calendar, Work Management, General Payments and Project Files.
- 2. Stat cards** — live totals: Total plots, Available, Advance and Registered. They update automatically as plots change status.
- 3. Grid / Map toggle** — switch between the plot-tile grid and the pinned site map.
- 4. Status legend** — green = Available, orange = Advance, blue = Sale Agreement, red = Registered.
- 5. Plot tiles** — one tile per plot showing its number, facing and size, coloured by its current status. Click any tile to open the full plot record.
- 6. Add plot** — add extra plots to the venture at any time.
- 7. Export PDF / Export Excel** — full project report from anywhere in the project.
- 8. Lock** — always one click away.

7. Managing a plot — details & payments

Click any plot tile and its complete record opens. The left side holds the plot's facts; the right side shows the money.

3 Payment history

10 Feb 2026 AC: ₹3,00,000

- 1. Plot details** — number, facing, size in sqyd, length × width, your price per sqyd, government price per sqyd, buyer name, phone and who referred them.
- 2. Payment summary** — calculated automatically: total price, government total, amounts received by each payment type, total paid and the outstanding balance in red.
- 3. Payment history** — every payment ever recorded for this plot, with date, type and amount.

8. Plot status, files & recording payments

Scroll down in the same plot window to change status, attach documents and record new payments.

The screenshot displays a form for managing a plot. It is divided into several sections, with five specific areas highlighted by numbered orange dashed boxes:

- 1. Status:** A dropdown menu currently set to 'Advance'. Below it is a date field for 'Advance date' showing '02/10/2026' and a text area for 'Notes' with the placeholder 'Any notes about this transaction'.
- 2. Files:** A section titled 'Files' with a green 'Upload' button and the text 'No files attached.'
- 3. Add payment:** A section for recording payments. It includes a 'Payment type' dropdown (set to 'White'), a 'Method' dropdown (set to 'Bank'), an 'Amount' input field, and a 'Payment date' field (set to '06/10/2026'). A green '+ Add payment' button is at the bottom.
- 4. Save changes:** A green button located at the bottom right of the form.
- 5. Delete plot:** A red button with a trash icon and the text 'Delete plot', located at the bottom left of the form.

Other visible elements include a 'Referred by' field with the placeholder 'Who referred this buyer' and a 'Cancel' button next to the 'Save changes' button.

- 1. Status** — move the plot through its life cycle: Available → Advance → Sale Agreement → Registered. Each stage stores its own date, and the dashboard, calendar and reports update instantly.
- 2. Files** — attach documents that belong to this plot (agreement copy, receipts, ID proofs) with Upload.
- 3. Add payment** — choose the payment type (White / Black / Advance), the method (Cash / Bank), the amount and the date, then press Add payment. The summary and balance recalculate immediately.
- 4. Save changes** — stores everything you edited.
- 5. Delete plot** — removes the plot (with confirmation).

9. Adding plots

Need more plots than you started with? Add plot opens this small form — the next plot number is already filled in.

The image shows a 'Add plot' modal form. A dashed orange box labeled '1' encloses the input fields: 'Plot No.(Site No.)' (containing '019'), 'Facing' (a dropdown menu with 'East / West / North / Sol' selected), 'Size(sqyd)' (empty), 'Length' (empty), and 'Width' (empty). A green button labeled 'Add' is highlighted with a dashed orange box labeled '2'. In the background, a plot grid is visible with two plots: a red one labeled 'North 002 67 sqyd 10 x 50' and a green one labeled 'North 012 67 sqyd 10 x 50'.

- 1. Details** — plot number (pre-filled with the next free number), facing, size, length and width.
- 2. Add** — the new plot appears in the grid immediately as Available.

10. The site map — pin plots on your real layout

Switch the dashboard to Map and work on top of your actual layout plan. Upload a photo or scan of the approved plan and pin every plot onto it.

- 1. Map tabs** — a project can hold several maps (site plan, location map, phase 2 ...). Add map uploads a new image.
- 2. Place pins** — turn on pinning mode, pick a plot and click its position on the plan. You can also drop custom landmark pins (park, entrance, water tank) in any colour.
- 3. Change image** — replace the plan image; your pins stay.
- 4. Remove map** — delete a map and its pins.
- 5. Plot pins** — each pin is coloured by the plot's live status, so the map doubles as a sales chart. Click a pin to open that plot's record.
- 6. Pin counter** — see at a glance how many plots are pinned.

11. Info Page — the whole venture in one table

The Info Page lists every plot with its customer, money received and status — ideal for a quick review or for handing to your accountant.

The screenshot shows the 'Info' page in the Estatly application. The left sidebar contains navigation links: Dashboard, Info Page (highlighted), Registered Plot Details, Customers, Payments, Calendar, Work Management, General Payments, and Project Files. The main content area is titled 'Info' and includes a search bar (1), filters for payment state (2) and registration stage (3), and download buttons for PDF (5) and Excel (5). The table lists 10 records with columns: ADVANCE DATE, CUSTOMER, PLOT #, TYPE, PAID, PAYMENT, REG., and a View button (4). The table is paginated (6) with 18 records shown.

ADVANCE DATE	CUSTOMER	PLOT #	TYPE	PAID	PAYMENT	REG.	View
10 Jun 2026	Ramesh Kumar	001	East	₹58,00,000	Paid	Registered	View
10 Jun 2026	Suresh Reddy	002	North	₹36,50,000	Partial	Registered	View
10 Jun 2026	Priya Sharma	003	West	₹25,00,000	Partial	Sale Agreement	View
10 Feb 2026	Anjali Verma	004	East	₹3,00,000	Partial	Advance	View
10 Jun 2026	Venkat Rao	005	South	₹28,50,000	Partial	Registered	View
10 Jun 2026	—	006	East	₹0	Unpaid	Available	View
04 Mar 2026	Lakshmi Naidu	007	North	₹2,50,000	Partial	Advance	View
10 Jun 2026	—	008	West	₹0	Unpaid	Available	View
10 Jun 2026	—	009	East	₹0	Unpaid	Available	View
22 Mar 2026	Ramesh Kumar	010	South	₹2,00,000	Partial	Advance	View

- 1. Search** — by customer name or plot number.
- 2. Filters** — narrow the list by payment state (Paid / Partial / Unpaid) and by registration stage.
- 3. The table** — advance date, customer, plot number, facing, total paid, payment badge and registration badge for every plot.
- 4. View** — jumps straight into that plot's full record.
- 5. Download PDF / Excel** — this exact table as a clean report.
- 6. Pagination** — flip through large ventures page by page.

12. Registered Plot Details — auditor & company books

Once plots are registered they appear in this ledger, built for the way plot businesses actually report: one view for the auditor, one for the company.

- 1. Add customer** — create a customer with name, phone, email and address.
- 2. Plots column** — every plot this customer holds, shown as plot numbers.
- 3. Edit / Delete** — keep the registry clean.
- 4. Download PDF / Excel** — share the full customer list.

14. Payments — the complete money trail

Every payment recorded on every plot, in one searchable ledger.

The screenshot shows the Estatly Payments interface. On the left is a dark sidebar with navigation links: All projects, PROJECT Green Valley Layout LP LP-2024-117, Dashboard, Info Page, Registered Plot Details, Customers, Payments (highlighted), Calendar, Work Management, General Payments, and Project Files. At the bottom of the sidebar are buttons for Export PDF, Export Excel, and Lock.

The main content area is titled 'Payments' with the subtitle 'All payments recorded across the project.' It includes two buttons: 'Download PDF' and 'Download Excel'. Below these are two annotations: 1. A 'Show totals' button. 2. A search bar with the placeholder 'Search by date, name, amount...' and a dropdown menu showing 'All plots' and '12 payments'.

The table below lists payments with columns: DATE, PLOT, CUSTOMER, WHITE (BANK), WHITE (CASH), BLACK (CASH), ADVANCE (CASH), and TOTAL. Annotations 3 and 4 point to the payment columns and the pagination controls respectively.

DATE	PLOT	CUSTOMER	WHITE (BANK)	WHITE (CASH)	BLACK (CASH)	ADVANCE (CASH)	TOTAL
22 Mar 2026	010	Ramesh Kumar	₹0	₹0	₹0	₹2,00,000	₹2,00,000

01 Nov 2025	001	Ramesh Kumar	₹30,00,000	₹0	₹0	₹0	₹30,00,000

Page 1 of 2

Navigation: < Previous Next >

- 1. Show totals** — expands a totals bar for every column.
- 2. Search and plot filter** — find payments by date, name or amount, or show a single plot's history.
- 3. Payment columns** — each payment split by type: White (Bank), White (Cash), Black (Cash), Advance (Cash) and the row total.
- 4. Pagination** — browse long histories comfortably.

15. Calendar — nothing slips through

The calendar writes itself: every registration, booking and payment you record appears on its date automatically. Add your own tasks and reminders on top.

1. **Colour legend** — Payment, Registration, Booking, Task and Reminder each have their own colour.
2. **Add task** — create a task or reminder (see below).
3. **Month navigation** — move between months.
4. **Today** — jump back to the current date.
5. **Event chips** — each entry shows on its day; busy days collapse into "+ more".

Adding a task or reminder:

1. Choose Task or Reminder.
2. Title and details.
3. Date and optional time.
4. Save.

16. Work Management — site work, materials & vendors

Track everything you spend on developing the layout — materials, machine hours, labour — and what is still owed to each vendor.

- 1. Tabs** — Dashboard for the overview, Work Details for entering data, Info for the combined ledger.
- 2. Materials / Work Done** — two groups: things you buy (cement, bricks, steel) and work you get done (excavation, road leveling, masonry).
- 3. Item cards** — each material or work item shows its entries and the outstanding balance owed to the vendor in red.

The screenshot displays the 'Work Management' section of the Estatly application. The left sidebar shows the project 'Green Valley Layout' and various navigation options. The main area is divided into 'Dashboard', 'Work Details', and 'Info' tabs. The 'Work Details' tab is active, showing a form to 'Add Materials'. The form includes fields for Date, Particular (Type of Work), and Name. Below these are four pricing type buttons: Quantity Based, Time Based, Day Based, and Iron. The 'Quantity Based' button is selected. The form also has input fields for Total Quantity and Price per Quantity, a notes section, and an 'Upload bill' button. A 'Calculated Total' is shown as ₹0. A '+ Add Entry' button is located at the bottom right of the form. Below the form, a section titled 'All Entries (4)' lists two entries: 'JCB Excavation' and 'Red Bricks', each with a date, time, and cost.

- 1. Info / Entry tabs** — Info shows the ledger; Entry is where you add new payments.
- 2. Payment Summary** — expandable totals for the whole project.
- 3. Search & filters** — by particulars, name, method (Cash / Bank) or source.
- 4. PDF / Excel** — export the expense ledger.
- 5. The ledger** — date, particulars, payee, amount and method for every entry; entries coming from Work Management are tagged automatically.

The screenshot displays the 'General Payments' section in the Estatly application. The left sidebar shows the project 'Green Valley Layout' and the 'General Payments' menu item is highlighted. The main area has tabs for 'Info' and 'Entry'. The 'Add Entry' form is shown with four numbered steps: 1. Date (06/10/2026), Particulars (e.g. Office rent, Transport, Misc...), Name (e.g. Person or vendor name...), and Amount (0). 2. Cash or Bank selection. 3. Add Entry button. 4. All Entries (4) list showing four entries with details like date, description, category, type, and amount.

Date	Description	Category	Type	Amount	Action
22 Feb 2026	Entrance Arch Construction	Sai Constructions	Cash	₹60,000	Edit/Delete
18 Jan 2026	Borewell Drilling	Aquabril	Cash	₹95,000	Edit/Delete
01 Oct 2025	LP Approval & Legal Fees	Advocate Rao	Bank	₹1,25,000	Edit/Delete
12 Sept 2025	Layout Survey & Demarcation	District Surveyor	Bank	₹85,000	Edit/Delete

Adding an expense:

1. Date, particulars, name and amount.
2. Cash or Bank.
3. Add Entry.
4. All entries with edit / delete.

18. Project Files — your document cabinet

Keep the venture's paperwork with the venture: LP approvals, survey plans, agreement templates, site photos, receipts.

- 1. Drag & drop** — drop any PDF, image, Word or Excel file straight onto the page.
- 2. Choose files** — or pick them with the file browser.
- 3. File cards** — every file with its size and date; View opens it, Download saves a copy, the red icon deletes it.

19. Reports & exports

Estatly turns its data into professional documents everywhere you see a PDF or Excel button: the project card on the home screen, the sidebar of every project, and on the Info, Registered, Customers, Payments and General Payments pages. PDF reports are formatted and print-ready; Excel exports open as multi-sheet workbooks (project, plots, customers, payments) that your accountant can work with directly.

Your data, your device

Estatly stores everything in a local database on the computer it runs on. There is no cloud account, no subscription server and no internet requirement — the software works fully offline. Back up the application's data folder and you have backed up the business.

Combined with the Main PIN, the instant Lock button and the decoy Duress PIN, Estatly is designed so that your business stays your business.

Thank you for choosing Estatly. For a demonstration or licensing enquiries, contact your Estatly representative.
